

In October 2014, the Competition and Markets Authority (the "CMA") published the Private Healthcare Market Investigation Order 2014 (the "Order") following its investigation into the private healthcare industry. The Order imposed requirements on private hospital operators to disclose certain information in relation to referring clinicians (as defined by the Order) for the benefit of patients. The information provided below is required by the Order.

### **Higher Value Services**

Consultants are charged £20 per hour pro rata for use of our Consulting Rooms, except in relation to consultations with NHS patients.

### **Lower Value Services**

We provide a range of support services to our Consultants for which we do not make a charge. These include:

- Insurance to cover the risk of a claim from or in relation to an NHS patient
- Support with patient administration including admission and billing
- Free tea and coffee
- General marketing such as promotional events and consultant directories

### **Corporate Hospitality**

We arrange training and information events for Consultants, local GPs and other healthcare professionals. No payments are made to any participant including Consultants for attending although refreshments may be provided and sometimes we pay to use external venues if insufficient space can be located on site or with geographical convenience in mind.

### **Financial Interests**

No Consultants have a share or a financial interest in our facility or any equipment used within the facility.

### **Payments to referring clinicians holding a part time position**

No consultants perform any part time duties and therefore no payments are made to any Consultants for such duties.
